Backlink Creation Guide

5-Step Process

Step	What You Do
Step 1	Find social bookmarking or blog sites (it depends on the type of backlink activity)
Step 2	Check DA, PA, and Spam Score of the site
Step 3	Create an account and fill in all profile fields
Step 4	Write a blog without self-promoting, mentioning Bitcot or adding a direct link, then publish
Step 5	Wait for review: approved or rejected

Step 1: Find the Right Sites

You can add backlinks on two types of sites:

- Social Bookmarking Sites: Submit your link directly (e.g., Mix, Diigo, Folkd, Scoop.it)
- Blog or Article Sites: Write a blog post and include your link inside (e.g., Medium, Tumblr, Blogger)
- Niche Directories: Industry-specific listing websites

How to find sites:

- Search on Google: "social bookmarking sites list" or "free blog submission sites"
- Use Ahrefs or SEMrush to see where your competitors get links

Target USA & Global Backlinks

Build backlinks from high-quality websites in both the United States and globally. However, if our primary target market is the USA, prioritize backlinks from U.S.-based websites with a .com, .org, or .us domain and an audience primarily located in the United States.

Focus on acquiring links from:

- USA business directories and local citation sites
- U.S.-based blogs and industry websites
- American news and media websites
- Local business associations and chamber of commerce websites
- High-authority global websites that are relevant to our niche

A healthy backlink profile combines relevant U.S. backlinks with authoritative global backlinks, helping improve credibility, authority, and search visibility in the U.S. while maintaining a natural link profile.

Step 2: Check DA, PA and Spam Score

Before you register on a site, check its quality using Moz (moz.com/link-explorer):

Metric	What to Look For
Domain Authority	30 or higher is good
Page Authority	20 or higher is good
Spam Score	Below 5%

Step 3: Create Account and Fill Profile

Register on the site and fill in all profile details. Common fields to fill:

Field	What to Enter
Name / Username	Use your name or brand name; use the same on all sites
Email	Use a dedicated email for SEO work
Website URL	Your target page or homepage link
Bio / Description	Short intro about you or your business
Profile Picture	Your logo or a clear photo
Address / Phone	Fill in if required; general info is fine

Step 4: Create Content and Publish

Two ways to add your backlink:

Method A -Direct Bookmarking:

- Title: Short and keyword-rich, under 60 characters
- URL: Paste your target page link
- Description: 150 to 300 words; write fresh content; do not copy-paste
- Tags: Add relevant keywords and category

Method B - Blog Post:

- Write a minimum of 500 words of original content
- Add your link naturally inside the article, not just at the end
- Use headings, short paragraphs, and at least one image
- Check for plagiarism before submitting; use Copyscape or Duplichecker

Step 5: Review and Approval

After you submit, the site will review your content. Approval time depends on site type:

- Social bookmarking sites: instant to 24 hours
- Blog or article sites: 1 to 5 days
- Niche directories: 3 to 14 days

What can happen after submission:

- Approved Backlink is live. Verify it in Google Search Console under Links
- Rejected: Rewrite your content, fix the issue, and try on a different site
- Account Suspended: Content was spam or copied. Do not re-register. Move to a new site

Important Notes:

- Use keyword variations and natural anchor text instead of repeating the exact same keyword across every submission.
- Avoid creating a large number of backlinks using the same keyword or anchor text, as this can appear spammy and create an unnatural backlink profile.
- Mix branded, partial-match, long-tail, and generic anchor texts to keep the backlink profile diverse and natural.

Quick Checklist - Before Every Submission

Site Check

[ ] Site is relevant to my niche

[ ] DA is 30 or above

[ ] Spam Score is below 10%

Account Setup

[ ] All profile fields are filled

[ ] Email is verified, and account is active

Content

[ ] Title is clear and keyword-rich

[ ] Content is 100% original

[ ] Target URL is correctly placed

[ ] Grammar and spelling checked

After Submission

- [ ] Submission logged in tracking spreadsheet
- [ ] Checked status after 2 to 3 days
- [ ] Approved link verified in Google Search Console
